# 1. Product features

#### 1.1 Main function

- A. Single-sided printing
- B. Manual feeding
- C. Back-end manual feeding, alarm for no card, few card, defective card slot was full
- D. Card holding, timeout automatic recovery
- E. Card feeding or exit mouth can be flexible change
- F. Optional Modules
  - ①Dual interface card encoding module
  - ②Contactless ID card encoding module
  - ③UHF chip card encoding module
  - (4) Magnetic stripe card encoding module
- G. Support full panel YMCKO ribbon, half-panel 1/2 ymcKO ribbon, Single colors ribbons (Black, White, Red, Blue, Gold, Silver)

# 1.2 Features

- A. Adopt high resolution dye sublimation(direct-to-card) print method
- B. Continuous card printing ability, save time and labor cost
- C. Easy and user-friendly operation
- D. Light body, easy maintenance
- E. Low noise
- F. High printing speed

# 2. Product parameter

Product Name	Seaory S25 desktop single-sided card printer
Print Method	Dye sublimation (Direct-to-card)
Power Supply	AC 100~240V, 50/60 Hz DC 24-25.5V, 2.7 A
Print Dimension	ISO CR80 (53.98mm×85.60mm) edge-to-edge printing
Print Resolution	300dpi × 300dpi, 300dpi × 600dpi, 300dpi × 1200dpi
Print Speed	Monochrome printing: 3-5s per card(single-sided) Full-color (YMCKO) printing: 18s per card(single-sided)
Card Material	PVC / composite PVC / other material upon request and validation

Card Thickness	0.3-1.05mm
Memory	128M
Operation system	Driver support: Windows XP/7/8/10, Windows Server 2003/2008/2012/2016, Linux
Display	Chinese:8 characters per line, 2 lines English:16 characters per line, 4 lines Support multi-language
Operating condition	Regular running temp.: 15°C-30°C (59-86°F), 20%-65%, RH non- condensing Lowest / Highest running temp.: 0°C(32°F)/40°C (104°F), 20%- 65% RH non-condensing
Storage condition	Temp.: -5°C-70°C(23-158°F),20%-70% RH non-condensing

# 3. Product introduction

# 3.1 Product Size

S25 card printer size : 244mm(L) $\times$ 160mm(W)  $\times$ 208mm(H) ,Net weight : 3.4Kg

# 3.2 Roof

#### Main function description:

- (1) Switch of upper cover: Lift this switch to open the cover.
- (2) Control panel buttons: Query and set card printer parameters.
- (3) LCM Screen: Display card printer parameters and status.
- (4) Air vent: Release the heat generates by card printer and print head.
- (5) Error light: Turns to red when the card printer is not ready or failure.
- (6) Status indicator lamp: Green light indicate the card printer is working normally.

## 3.3 Back-end

#### Main function description:

- (1) USB Interface: USB-B type interface, connect directly to PC side.
- (2) Power port: DC24-25.5V 2.7A.
- (3) Power switch: connect or disconnect power.

# 3.4 Front-end

#### Main function description:

Card exit mouth: It can be Manual single card feeding mouth or Back-end card exit mouth. Card spit out length can be set freely.

# 3.5 Bottom

#### Main function description:

F)

Bottom cover: Place to install Magnetic stripe card and chip card encoding module.

Card printer bar code: Information needed when you need technical services from us.

#### 3.6 Internal structures

#### Main function description:

- A Air fan: absorb and release the print head's heat when it works.
- B Print head: need regular cleaning.
- C Ribbon cartridge: accessory to install ribbon.
- D Cleaning roller: sticky card surface dust, improve the printing effect.
- E Ribbon pickup roller: recycle used ribbon.
- F Ribbon supply roller: unused ribbon ends.

**Cleaning stick** 

1PC

Power adapter 1PC

Cleaning roller 1PC

Cleaning card 5PCS

Power cable 1PC

Warranty card 1PC

1PC

CARDE 

CD 1PC

### Main function description:

- (1) Power adapter: convert DC voltage.
- (2) Power cable: connect to power adapter.
- (3) USB cable: communication connection between PC and card printer.
- (4) Cleaning roller: sticky card surface dust, improve the printing effect.

(5) Cleaning card: double-sided 3M standard card, cleaning card printer internal card passing channel dust.

(6) Warranty card: need to use it while supply technical service, please keep it properly.

(7) Cleaning stick: cleaning the print head.

(8) CD: storage ICARDE software, card printer driver, Operation instruction etc.

# 5. Installation and usage

# 5.1 Install cleaning roller

Step1: Gently lift the upper cover switch, open upper cover.

Step2: Take out the ribbon cartridge.

Step3: In order not to interupt the normal work of card printer, please follow below image to take out of the pearl wool which inside the printer(It's unneccessary to place pearl wool when card printer is normal working)

Step4: Remove 3M hyaline layer on cleaning roller surface, take the cleaning roller's both sides by hand. After pushing into the mounting position, gently press down.

The purpose of cleaning roller is to absorb the dust on the card and card feeding roller, improve the printing effect.

# 5.2 Install ribbon

Step1: Open the ribbon box, takeout the ribbon.

👔 In order to ensure the normal use of the printer, please use Seaory original ribbon.

Step2: Install the ribbon into the cartridge according to the color direction.

yellowroller supply with unused ribbon. White roller supply with used ribbon.

Step3: As shown in picture below, take ribbon cartridge's side, install the ribbon cartridge and close the upper cover.

A

Ribbon mounting direction: Red roller close to the Back-end card exit mouth(left), white roller close to the input hopper (right).

# 5.3 Wiring installation

Step 1: Take out the power cable and power adapter from the accessories box. Connected all cables as below picture.

Step 2: The power adapter DC output connected to the card printer power interface, and the power line AC input connected to the mains socket.

To ensure the card printer work stably, please use Seaory original power adapter.

#### Step 3: Communication interface cables installation

USB communication interface installation: USB-A interface (square type) connect to PC end and USB-B interface (round type) connect to card printer's USB port.

# 6. Driver installation

## 6.1 Operation system

Support Windows XP/7/8/10, Windows Server 2003/2008/2012/2016, Linux, Android

# 6.2 Notice before installation

(1) Card printer driver can be download from accessories box's CD or official website :www.seaoryprinter.com.

(2) Some antivirus applications will stop the driver installation, so please close all antivirus applications before installation. After finished, you can open all antivirus applications.

(3) Please do not power on card printer until the driver installation is completed.

The driver will be continuously updated, the version number will be the actual version.

(4) Connect card printer power supply and USB communication interface in advance (please refer to 5.5 wiring installation).

# 6.3 Driver installation steps (USB communication interface)

Step 1: Double-click the icon "Seaory S series driver exe".

Please install driver by administrator and close all antivirus applications before installation.

#### Step 2: Then click "Install" button as show in below picture.

#### Step 3: Wait for one minute.

Step 4: Please select always trust software from "Shenzhen Seaory Technology Co., Ltd." in the pop-up windows, then click the "Install" button.

Step 5: Please click the "Finish" button as show in the below picture, then the driver has been installed.

Step 6: Turn on the card printer power switch, then card printer driver will install automatically. After it, click "Control panel – Hardware and sound – Devices and printers" you can find Seaory S25 was installed completely.

Auto Feed Card Test	Exit	Reset to factory default

- L is print start position, decrease L value when the start side has white edge.
- T is print finish position, decrease T value when the finish side has white edge.
- Increase the L and T value when the ribbon is easy to break.
- S is print side position, decrease S value when the side has white edge.

It's suggested to add or subtract 1 unit parameter value gradually according to the print effect.

**i** )

## 7.14 Cleaning tool

Deposition of dust or contaminants inside the card printer may cause damage to important parts and affect the printing effect. Therefore, it's recommended to clean the printer when changing the ribbon or at least clean one time a month.

# 7.15 Magnetic stripe tool

	Auto Feed Card Test	

Apply to printer: after setting new parameter value, click "apply" to take effect.

### 7.17 Other tools

(1) Renew print head: please renew the new print head barcode after replaced print head. Otherwise it may lead to print problem.

(2) Automatic card feeding testing tool: verify the card can be feeding automatically.

# 8. Print test

## 8.1 Driver test page

Step 1: Open "Printing preferences", click "Tool", find and click "Position Calibrate".

Step 2: Place some white card into input hopper, then click" Print test Chart".

How to feeding the card:

Card feeding from front-end feeding/exit mouth is default chosen. Manual feeding card piece by piece from Back-end card feeding/exit mouth is optional. You can setting prefer card feeding mouth at "Printing preferences" like below picture.

Print Option Image Color Print Area Magnetic	c Encoding Heating Energy Tool
Ribbon Type: Automatically detect the installed ribbon for every print job. YMCKO ~	Orientation: O Portrait Landscape
□ Rotate 180 □ Mirror	
Feed card: Front end manual feed slot Front end manual feed slot Back end manual feed slot	~

If you are using chip card or magnetic strip card, please feeding the card like ATM card insert direction.

# 8.2 Seaory iCARDE card design software

After all the above steps are completed, relevant software can be used to print and test the card printer. You can also do print test through Seaory's iCARDE software. For details, please refer to Seaory iCARDE manual.

# 9. Cleaning and maintenance

## 9.1 Replace cleaning roller

The purpose of the cleaning roller is to absorb the dust on the card and improve the printing effect.

Replace cleaning roller after every roll of ribbon use up or one time per month. Operating details please refer to 5.1 section.

## 9.2 Cleaning card moving path

Deposition of dust or contaminants inside the card printer may cause damage to important parts and affect the printing effect. Therefore, it's recommended to clean the printer when changing the ribbon or at least clean one time a month.

(1) Driver operating guide please refer to 7.14 section.

(2) LCM operating guide:

Step 1: Take out the cleaning card from the accessory box and remove the 3M hyaline layer on cleaning card's both sides and put it into input hopper.

Step 2: When Card printer shows "Ready", press "OK" one time, then press ">" two times.

Step 3: LCM show "Clean function" press "OK" one time. Then LCM will show "Open the cover".

Step 4: Open the cover, take out ribbon cartridge, and then close the upper cover.

Step 5: Press "OK" one time. The card printer will start to cleaning.

Step 6: The cleaning card will be exit from card exit mouth after finished cleaning. After it, please install the ribbon cartridge and close the upper cover.

## 9.3 Cleaning print head

Print head is the most important and valuable part of card printer. Like a car, it's a consumable product that will eventually breakdown. Only continuous attention to maintenance can extend it's lifespan.

Maintenance method is to use the cleaning stick for cleaning. Clean it every time you change the ribbon or printing effect is poor. And it's also recommended to clean the print head once a month.

#### Cleaning print head steps:

Step 1: Take out cleaning stick from accessories box.

Step 2: Turn off the card printer, open the upper cover and find the print head show in below picture.

Step 3: Wipe the print head in one direction, from left to right or right to left with cleaning stick. Do not wipe back and forth. Generally wipe 3-5 times will be ok.

Avoid print head direct contact with metal objects, sharp objects or fingers, and do not contaminate any liquid to clean the print head.

# 10. Replace print head

In the long-term use of printer, when the expiration of lifespan or no regular cleaning or maintenance or artificial damage, the printing will appear broken needle, blank vertical stripes etc. Then you need to replace the print head.

#### Replace print head steps:

Step 1: Take out the new print head and record it's serial number.

Step 2: Turn off the card printer, open the upper cover and find the print head show in below picture.

Step 3: Look closely at the mounting structure on both sides of the print head.

Front

#### Step 4: Remove print head

Hold the print head on both sides by hand and press the print head toward the cover. At this time, the spring will be compressed. Loosen the print head when the small cylinder on both sides of the print head comes out of the metal hook.

Find the wiring and pull it out from the wiring plug with your hand.

#### Step 5: Install new print head

Take out the new print head and connect the print head wiring to the wiring plug. Note that the direction of the wiring plug must be the same as the print head interface.

Clip the print head onto the hook and hold part A against part B until the cylinders on both sides of part A are stuck on the metal hook.

#### Finished

Step 6: Enter the new print head serial number into the driver. Failure to enter may result in an abnormal print.

Open "Printing preferences", click "Tool", find and click "Renew print head".
